AND USER
INSTRUCTIONS**

ABOUT THIS DACOBLUE BAG

This bag is designed to give the user a flexible, spill free and portable alternative to traditional fuel/water cans.

The Dacoblue sack will take up minimal space when not in use, its lifting handles and shoulder harness are ergonomically placed to relieve the users from the strains normally felt when handling fuel/water cans.

Its design revolves around simplicity and user friendliness.

- **Fold it and stow it away when empty.**
- **Freestanding stable when filled.**
- **Carry it on your back for longer distances.**
- **Connect it directly to your outboard engine or other consumer.**

This is just a few benefits we hope u as a user will enjoy.
